### MESSAGE

I am pleased to know that National Medical Library (NML) is launching its all new Website for the benefit of Medical fraternity at National and International level. The new additional features will be of definite benefit to the users in exploring the treasures within NML.

The National Medical Library as a focal point for Medical Information System, is playing a key role in the National healthcare of our country. It is focusing its attempt to reach users in every nook and corner of the country through online access. I congratulate NML team for its untiring efforts.

The Electronic Resources in Medicine (ERMED) Consortium is also being managed by NML and has recently added Medical databases which make it a treasure trove for Medical fraternity. The access to ERMED has considerably reduced the burden on the National exchequer and will immensely benefit the medical students and professionals alike.

(Dr. Mansukh Mandaviya)
